

Agricultural Declaration for Social and Environmental Responsibility

Compromise and Responsibility

Following a continuous, intense search for opportunities carried out by a team that is passionate about wine and our land, we have revealed our Agricultural Declaration for Social and Environmental Responsibility, this document address the sustainability in our vineyards. These eight-point are a guide and commitment towards more sustainable production, care for the people, and, of course, of the environment to develop a responsible and conscious industry. Agricultural Declaration for Social and Environmental Responsibility

01 Our people

People are at the center of our productive process. For this reason, we strive to promote their comprehensive development, well-being and quality of working life. At the same time, we take care to have a good and healthy coexistence with our neighbors and communities.

02 Soils

We have intensified the improvement process in our vineyards, by introducing technologies and innovations to nurture living soils, among other things.

03 Water

We will continue to migrate towards systems and technology which enable us to determine the state of climatic conditions and the water demand of the soils and vines, giving maximum precision for irrigation.

04 Flora & fauna

We recognize the importance of preserving regions of High Ecological Value (HEV), and we aim to maintain an ecosystemic balance in our plantation and its natural environment, through protection and reforestation projects for native flora.

05 Productivity & Efficiency

Our philosophy is to achieve high agricultural standards with a holistic focus which involves our people, our vineyards and our surroundings, and which promotes long-term productivity.

06 Renewable Energies

We will constantly search for alternatives which enable us to evolve in our energy matrix, in order to decarbonize our industry and fulfill the Company challenge to be Climate Positive by 2050 (IWCA).

07 Responsible Supply

We will continue to accompany our grape and wine producers in the task of incorporating sustainable measures into their vineyard and team management.

08 Excellence & Compliance

We strive to keep on working in a rigorous, cutting-edge way, fulfilling expectations and making continuous improvement.
