

Ecodesign Policy

vspt.wine.group

At VSPT Wine Group Sustainability is part of our purpose and is one of our five corporate values. Under our 360° Commitment model, we've challenge ourselves on reaching five new goals by 2023.

1 100% Renewable Energy
(for our electricity demand)

2 Promote wine responsibly across all of our brands throughout our b.smart program.

3 Manage 100% of our industrial waste.

4 Decrease our greenhouse gas emissions by 25%

5 Incorporate Ecodesign into our entire portfolio.

In order to comply with this last goal, we have developed an Ecodesign Policy, which will allow us to decrease the environmental impact caused by our bottles and packaging. We have focused on circular economy, by which materials follow a course which ensures later reuse, recycling or compost. As a result, we will decrease greenhouse gas emissions, household waste generation, natural resource extraction, and therefore reduce environmental impact.

Ecodesign is therefore a key tool for achieving our goals and will enable us to minimize the environmental impact of our products during their life cycle.

Ecodesign Policy

Ecodesign ambitions for 2030

The goal of this policy is to present our ambitions in Ecodesign, to be used as guidelines both for current designs of our bottles and packaging, as well as projects for the future.

Goals for 2030

1 Reduce the weight and quantity of our primary and secondary packaging and bottles.

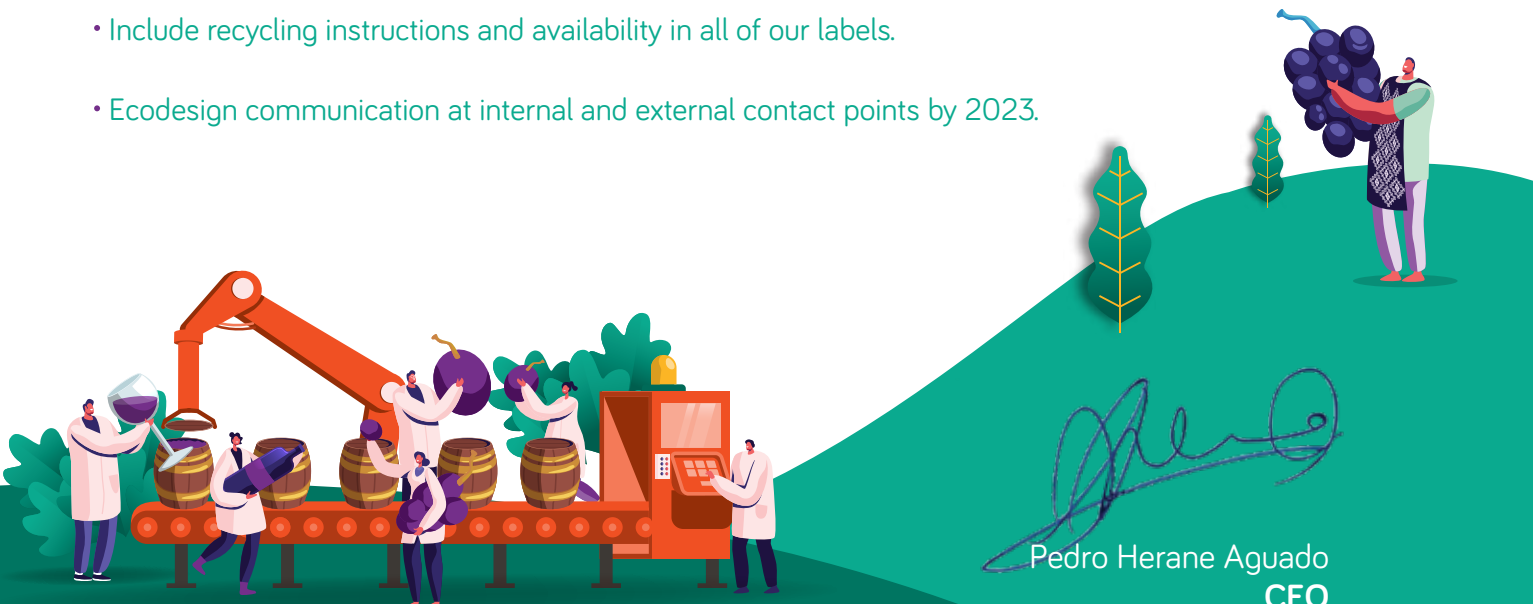

- Unidad funcional 15% más liviana.

2 Use of manageable materials

- 100% of our bottles and packaging should be separable, reusable, recyclable and / or compostable.
- 60% of the portfolio should be made from recycled materials.
- 0% PVC use by 2023.

3 Promote conscious consumption

- Include recycling instructions and availability in all of our labels.
- Ecodesign communication at internal and external contact points by 2023.
